New in Sage SkillsMap

Version 19.09.05
12 September 2019

Annalise Scalliet and Susan de Wet

# Contents

Fixes Implemented

Some general fixes were implemented with this release

Notify Users of new chat option used by Support

Selecting to access the SkillsMap system, the Login page will display a message from the SkillsMap Support Team, information on the new Chat option introduced by Sage.

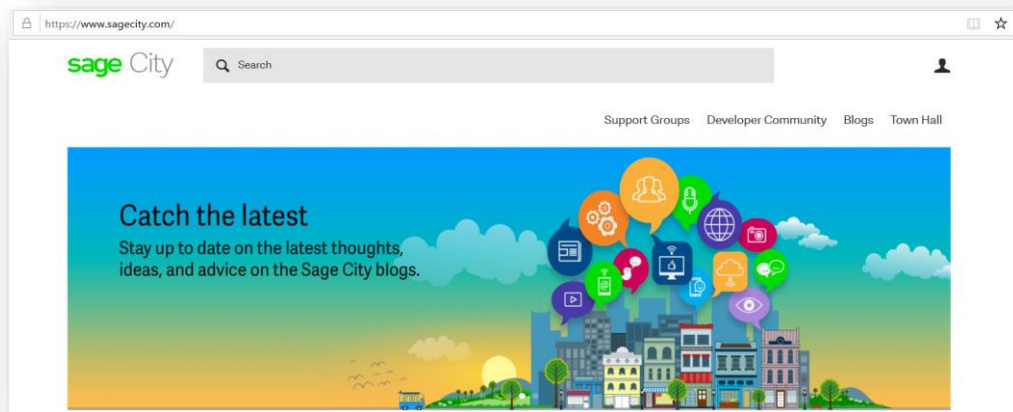

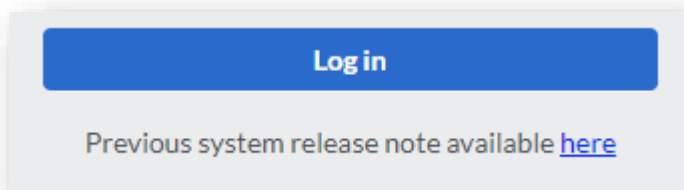

Notify Users of previous Release Notes link available to use

Selecting to access the SkillsMap system, the Login page will display a message from the SkillsMap Support Team, a link to access Sage City introduced by Sage.
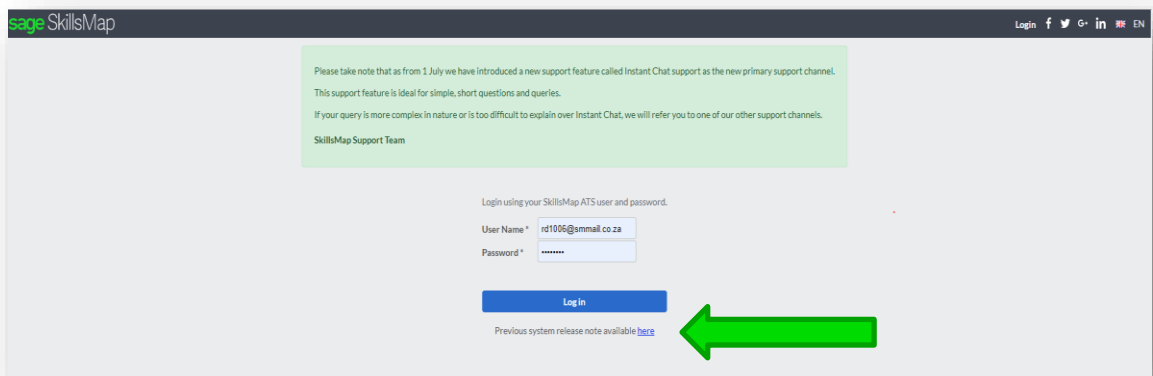

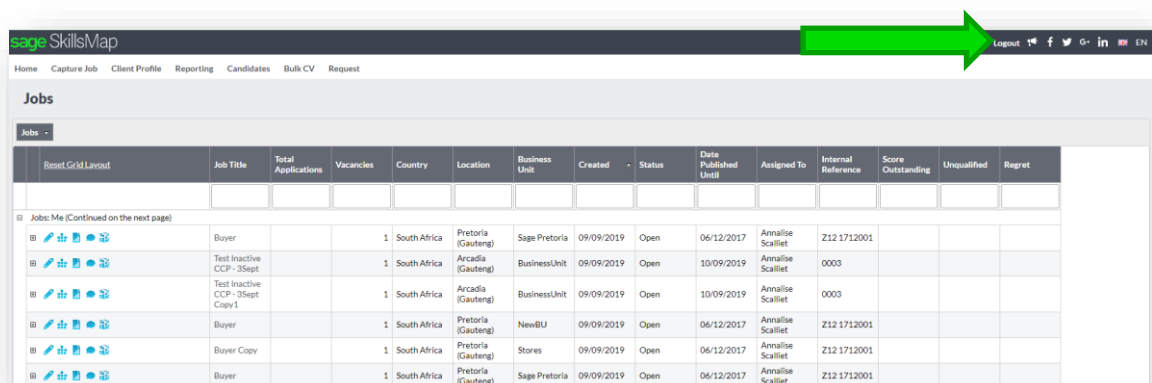

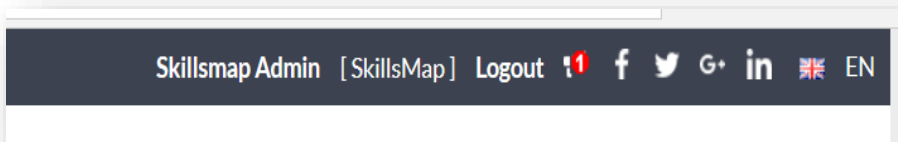

Link available to use: https://www.sagecity.com/ - Use the search functionality and search on "SkillsMap" for previous Release Notes.

Notify Users of new Release Notes available

Selecting to access the SkillsMap system, on the Jobs Home page an Indicator will be displayed when new System Release Note are available.

Note: The Indicator will disappear after the System Release notes was accessed.

Capture a Job - Business Unit & Contact detail now mandatory

Selecting to capture a Job, the system will now indicate if the Business Unit & Contact detail are missing or incomplete.

Inactive Client Career Portal - not visible when selecting to Publish a Job

If a Client Career Portal (CCP) was set to be Inactive, selecting to publish a Job this CCP was still available to select upon publishing.
