

If the user does not get the option to browse when running certain reports and gets the error below, they must follow the steps in this document. The error is due to new People reports that automatically picks up the directory.

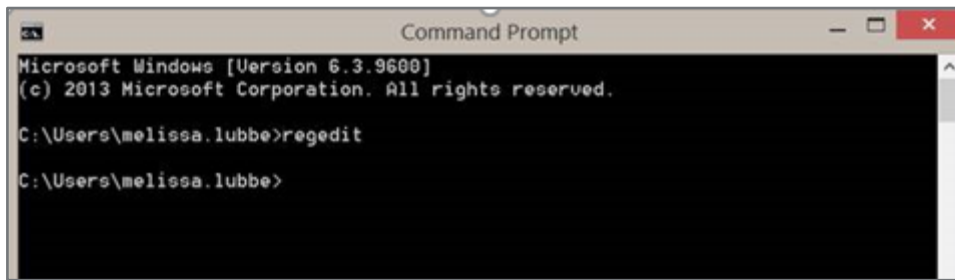

On the Task Bar:

Click on	Start
Search	CMD
Click on	Enter on your Key board

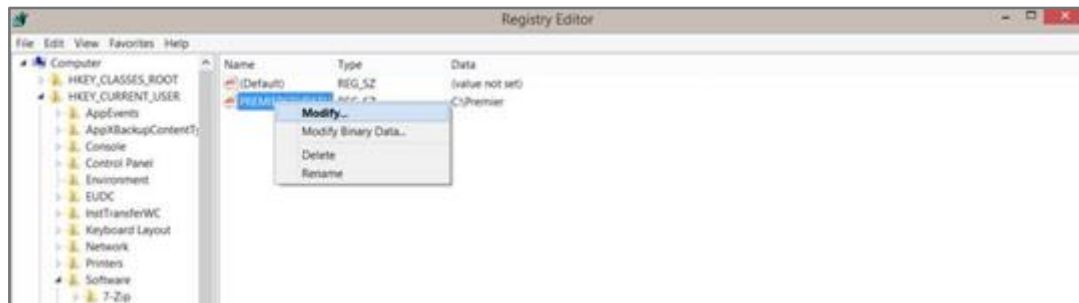

On the Command prompt type in REGEDIT and enter.

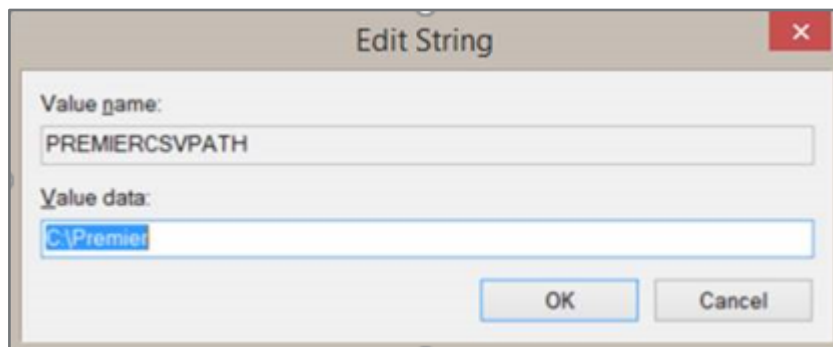

On the Registry Editor:

Expand	HKEY_CURRENT_USER
Expand	Software
Double Click on	VIP Payroll
Right click on	PREMIERCSVPATH
Click on	Modify

Clear Value Data field and click on OK.

Please run the report again to test.
