

Validation Error:

Business telephone number must start with 0

Background

When running the IRP5/IT3a report the error prints on the report.

Possible Solution:

- Access the Employee Information (IS) screen
- Validate that all telephone numbers, starts with a 0 (national numbers) or 00 (international numbers)
- No spaces allowed in the numbers (format must be xxxxxxxxx and not xxx xxx xxx)
- no + sign should be in the number, only numeric values allowed
- all numbers must be at least 9 characters
