

e@syFile Errors

If ETI qualifying 12 month period indicator (code 7005) is 1

Background

When importing the IRP5 file, the error will appear on the payroll Log file:

If ETI qualifying 12 month period indicator (code 7005) is 1, then If Monthly calculated ETI (code 7004) cannot be greater than R1000 for ETI Month XX

Possible Solution:

If your employee is in Set 1, the value for ETI cannot be more than R1000

- You will need to investigate the specific month mentioned in the error, to determine why the value for ETI is greater than R1000
- Could be a take-on or the rate factor causing the issue
- We have seen this on late terminations as well
